VANDOR

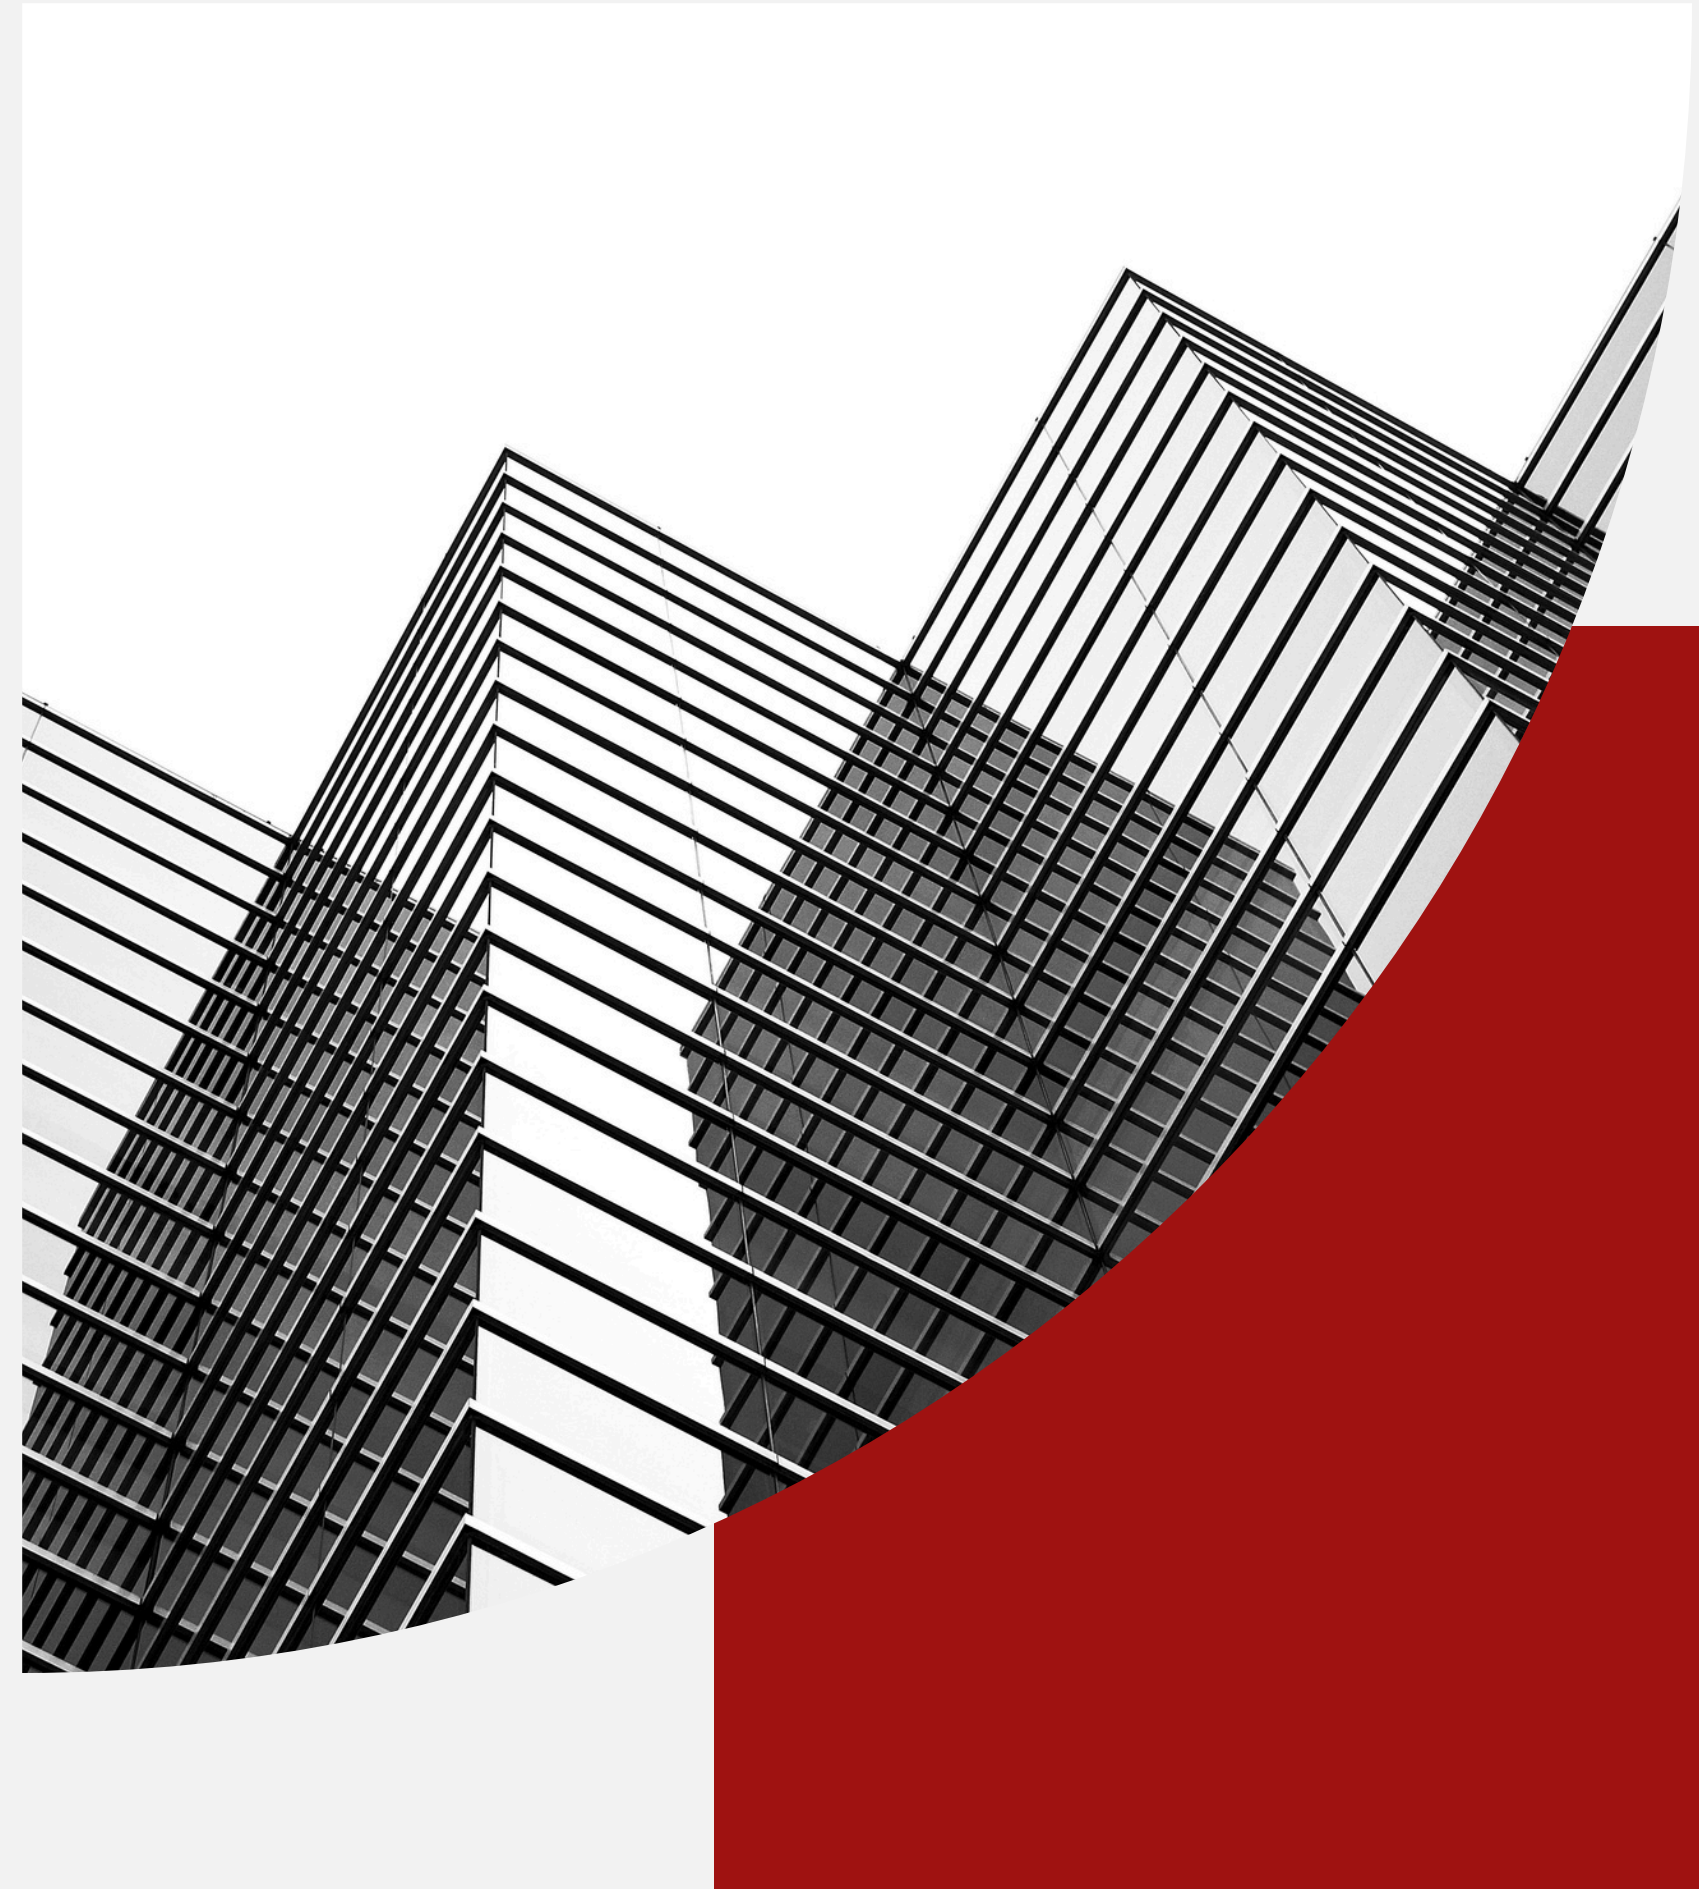

# About Us

Vandor is a UAE-based technical services company specializing in petroleum construction support, metal fabrication, welding works, industrial maintenance, mechanical services, and site-based technical support.

We are built to serve clients who require reliable workmanship, responsive execution, safe site operations, and practical technical solutions. Our services support a wide range of sectors, including oil and gas contractors, construction companies, ports, warehouses, logistics facilities, factories, industrial sites, commercial buildings, facility management companies, and infrastructure projects.

Although our company name includes Petroleum Construction, our capabilities are not limited to oil and gas. We provide fabrication, welding, maintenance, repair, installation, and technical support services for clients across multiple industries where metalwork, mechanical reliability, and site execution are essential.

Our approach is simple: understand the requirement clearly, plan the work properly, execute safely, maintain quality, and deliver on time.

## Vision

To become a trusted UAE technical services partner known for reliable fabrication, welding, industrial maintenance, and petroleum construction support across multiple sectors.

## Mission

To deliver safe, practical, and quality-driven fabrication, welding, maintenance, and technical services that help clients keep their sites, facilities, equipment, and operations running efficiently.

# Positioning

Vandor is positioned as a dependable fabrication, welding, petroleum construction support, and industrial maintenance partner for companies that need practical site and workshop solutions.

We support clients with both planned works and urgent requirements, including fabrication jobs, structural modifications, equipment support works, welding repairs, maintenance assistance, installation works, and industrial technical services.

We are especially suitable for clients who need a professional, responsive, and flexible contractor capable of handling small to medium technical works with proper coordination, documentation, and execution discipline.

## Core Values

### Reliability

We understand that delays in site work, maintenance, and fabrication can affect client operations. We aim to respond quickly, plan properly, and complete work with accountability.

### Professional Communication

Clear communication, proper documentation, and transparent scope control are part of how we work.

### Safety

Welding, fabrication, and maintenance work involve real site risks. We prioritize safe working practices, proper PPE, site coordination, and risk awareness in every job.

### Quality Workmanship

We focus on correct measurements, proper fit-up, suitable welding methods, clean finishing, and reliable execution.

### Practical Solutions

We aim to solve client problems in a realistic and cost-effective way, especially in maintenance, repair, and modification works.

## What We Do

At Vandor, we provide practical fabrication, welding, petroleum construction support, industrial maintenance, and technical services for clients across oilfield, construction, industrial, logistics, facility, and commercial sectors. Our work supports site operations, structural requirements, equipment reliability, maintenance needs, and custom metalwork requirements across the UAE.

VANDOR

# Petroleum Construction Support Services

We provide technical support services for oilfield, petroleum, energy, and industrial contractors requiring fabrication, welding, installation, repair, and maintenance assistance.

## Services Included:

- Petroleum construction support works
- Oilfield and industrial site support
- Steel structure support works
- Pipe support fabrication and installation
- Equipment base fabrication
- Skid and frame fabrication support
- Platform, ladder, and access structure fabrication
- Minor mechanical modification works
- Site welding and repair support
- Shutdown and maintenance support assistance
- Industrial facility support services

# Fabrication & Steel Works

We undertake metal fabrication works for industrial, construction, commercial, warehouse, logistics, and facility maintenance clients.

## Fabrication capabilities include:

- Steel structures
- Frames and supports
- Equipment bases
- Platforms and walkways
- Ladders and handrails
- Pipe racks and pipe supports
- Brackets and mounting supports
- Gates, grills, and railings
- Safety barriers and bollards
- Warehouse protection structures
- Machine guards
- Custom steel items
- Site modification fabrication

# Welding & Repair Services

We provide welding services for workshop fabrication, site repair, industrial maintenance, and construction support requirements.

## Welding services include:

- Arc welding / stick welding
- MIG welding support
- TIG welding support, where required
- Structural welding
- Pipe support welding
- Repair welding
- On-site welding
- Maintenance welding
- Fabrication welding
- Stainless steel welding, subject to requirement
- Aluminum welding, subject to requirement and specialist availability

## Applications include:

- Arc welding / stick welding
- MIG welding support
- TIG welding support, where required
- Structural welding
- Pipe support welding
- Repair welding
- On-site welding
- Maintenance welding
- Fabrication welding
- Stainless steel welding, subject to requirement
- Aluminum welding, subject to requirement and specialist availability

# Site Installation & Modification

We support clients with installation, modification, repair, and replacement works at active sites and facilities.

## Services include:

- Site installation of fabricated items
- Anchoring and fixing works
- Alignment and leveling support
- Site welding
- Cutting and modification works
- Replacement of damaged steel items
- Emergency repair support
- Shutdown support works
- Coordination with client site teams
- Work permit and hot work permit coordination support

# Industrial Maintenance Services

We support industrial sites, factories, warehouses, logistics facilities, commercial buildings, and facility management clients with technical maintenance and repair works.

## Services Included:

- Preventive maintenance support
- Corrective maintenance support
- Mechanical repair support
- Fabrication-related maintenance
- Welding repair works
- Replacement of damaged metal parts
- Reinforcement of existing structures
- Equipment support modifications
- Access structure repair
- Platform, ladder, and railing repair
- Industrial site maintenance assistance
- Facility maintenance support works

# Mechanical and Technical Services

We provide technical support for mechanical and site-based requirements connected to fabrication, installation, maintenance, and repair.

**Services include:**

- Mechanical equipment support works
- Minor mechanical installation support
- Equipment base and support fabrication
- Industrial component support works
- Pump and motor base supports
- Machinery frame repair
- Site measurement and modification support
- Technical manpower coordination for project works
- Workshop and site technical assistance

# Structural Steel Support Works

We provide structural steel support services for construction, industrial, warehouse, logistics, and facility clients.

## Services Included:

- Steel platform fabrication
- Mezzanine support works, subject to design approval
- Canopy support structures
- Access platforms
- Walkways
- Handrails
- Ladders
- Support frames
- Pipe racks
- Industrial sheds and support structures
- Strengthening and modification works

# Surface Finishing and Corrosion Protection Support

We provide or coordinate finishing and corrosion protection services depending on project requirements.

## Services include:

- Grinding and weld finishing
- Surface preparation
- Primer and paint application
- Anti-corrosion coating support
- Epoxy coating coordination
- Industrial painting coordination
- Powder coating coordination
- Hot-dip galvanizing coordination
- Stainless steel polishing support
- Sandblasting coordination

# AMC Support Services

We provide flexible Annual Maintenance Contract support depending on the client's site requirements, operational needs, and agreed service scope.

**Services include:**

- Scheduled inspection visits
- Welding and fabrication repair support
- Steel structure condition checks
- Preventive maintenance support
- Corrective maintenance assistance
- Emergency repair response
- Minor modification works
- Replacement of damaged metal parts
- Platform, ladder, and railing repair
- Equipment support and base repair
- Site welding support
- Technical reporting
- Priority support for approved clients

# Industries We Serve

## Oil and Gas / Petroleum

We support petroleum construction contractors, oilfield service companies, energy sites, and industrial contractors with fabrication, welding, maintenance, repair, and site support works.

## Construction

We serve main contractors, subcontractors, MEP contractors, civil contractors, and fit-out companies requiring steel fabrication, supports, access structures, site welding, and modification works.

## Ports and Logistics

We support ports, warehouses, logistics facilities, loading areas, storage facilities, and distribution centers with structural supports, barriers, platforms, repair works, and industrial maintenance assistance.

## Factories and Industrial Sites

We support manufacturing plants, workshops, industrial facilities, and production environments with maintenance fabrication, equipment supports, machine guards, repair works, and mechanical support services.

## Commercial and Facility Maintenance

We serve commercial buildings, facility management companies, schools, hospitals, hotels, and property maintenance teams requiring reliable fabrication, repair, installation, and maintenance support.

## Marine and Offshore Support

Subject to project requirements, we support marine-related clients with corrosion-prone metalwork, fabrication support, repair works, and site-based technical assistance.

## Why Choose Us?

### Multi-Sector Capability

We are not limited to one narrow field. Our services support oil and gas contractors, construction companies, warehouses, ports, factories, logistics facilities, industrial sites, commercial buildings, and facility maintenance clients.

### Strong Workmanship Focus

Good fabrication depends on accurate measurement, clean fit-up, suitable welding, proper finishing, and careful installation. These fundamentals guide our work.

### Practical Technical Support

We understand that clients often need more than basic fabrication. They need site measurement, repair thinking, installation support, maintenance assistance, and practical problem-solving.

### Clear Scope and Communication

We believe professional communication prevents project disputes. We aim to define scope, inclusions, exclusions, timelines, and assumptions clearly before work begins.

### Responsive Execution

We aim to support both planned and urgent works with proper coordination, clear communication, and timely response.

### Flexible Business Support

We can support one-time jobs, maintenance requirements, urgent repair works, fabrication packages, site modification works, and ongoing client support.

# Service Packages

1

## Fabrication Works Package

For clients requiring custom steel items, supports, platforms, frames, barriers, ladders, handrails, brackets, or structural elements.

2

## Welding and Repair Package

For clients requiring custom steel items, supports, platforms, frames, barriers, ladders, handrails, brackets, or structural elements.

3

## Industrial Maintenance Support Package

For clients requiring custom steel items, supports, platforms, frames, barriers, ladders, handrails, brackets, or structural elements.

4

## Construction Support Package

For clients requiring custom steel items, supports, platforms, frames, barriers, ladders, handrails, brackets, or structural elements.

5

## Petroleum Construction Support Package

For clients requiring custom steel items, supports, platforms, frames, barriers, ladders, handrails, brackets, or structural elements.

# Our Commitment

At Vandor, our commitment is to deliver fabrication, welding, petroleum construction support, industrial maintenance, and technical services with professionalism, safety awareness, and dependable execution.

We understand that our clients operate in environments where delays, poor workmanship, unclear coordination, and unreliable support can affect operations. That is why we focus on clear communication, practical planning, skilled workmanship, and responsible site execution from the beginning of every requirement.

As a growing UAE-based company, we are focused on building long-term client trust through disciplined work, responsive support, and consistent service quality. We do not believe in overpromising. We believe in understanding the requirement, preparing properly, executing safely, and delivering work that meets the client's operational needs.

**Your technical support partner for fabrication, welding, industrial maintenance, and petroleum construction works across the UAE.**
